

# The Petroleum & Renewable Energy Company Ltd

## Geothermal Energy

The development of clean sources of energy will be essential to meeting the aims of the Paris Agreement and achieving net zero by 2050. As a relatively clean and sustainable alternative to traditional sources of fuel, geothermal energy can play an important and growing role in gaining independence from non-renewable resources such as coal and oil.

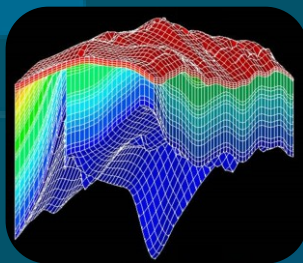

## Our Services

Petrenel has over 20 years of experience providing consulting and advisory services to the upstream energy industry. In connection with Geothermal Energy, Petrenel has undertaken regional studies, forensic investigations, and complex thermal reservoir modelling. Petrenel offers a range of technical, commercial and ESG services to the Geothermal industry, including:

Geothermal Exploration

Reservoir Modeling

Feasibility Studies

Independent Resource Audits
